ABSTRACT

Sociology, the study of the organization and activities of human societies, encompasses many fields of inquiry and consequently the literature of the discipline is vast. In providing access to some of this literature, this guide concentrates on reference sources which may be found in McLennan Library of McGill University, Montreal, Canada. Areas of study for which most materials are located in another library, such as applied sociology or the sociology of education, have generally been treated only as they are covered in works of broader scope. In addition, topics given primary coverage in other bibliographic guides prepared by the Reference Department have been given limited coverage or omitted. Sources for theses have not been listed as a separate category in this guide, although some thesis bibliographies on particular topics have been included in the appropriate subject sections. Indexes to periodical articles of broad sociological interest are listed in a separate section. Indexes to periodical articles on more specialized topics are included in the appropriate subject section, e.g., demography. The bibliography is organized into the following five sections: (I) Guides and Handbooks; (II) Dictionaries and Encyclopedias; (III) Directories and Biographical Sources; (IV) Statistics; and (V) Bibliographic Sources. The last section is divided into: (A) Sociology and General Social Sciences, including current and retrospective bibliographies; (B) Special Subjects, including crime, delinquency, deviance and drug use; demography; ethnic studies; industrial sociology; research methods; rural and urban sociology; sexuality and family relations; social problems; social structure and change; and sociological theory; and (C) Periodical Lists. Sociology: A Guide to Reference Sources

Sociology, the study of the organization and activities of human societies, encompasses many fields of inquiry and consequently the literature of the discipline is vast. In providing access to some of this literature, this revised guide concentrates on reference sources which may be found in McLennan Library. Areas of study for which most materials are located in another library, such as applied sociology or the sociology of education, have generally been treated only as they are covered in works of broader scope. In addition, topics given primary coverage in other bibliographic guides prepared by the Reference Department have been given limited coverage or omitted. Users are advised to consult the following relevant guides:

Anthropology
Economics
Psychology
Theses
Urban Affairs
Women's Studies

There are a number of bibliographic databases covering topics in sociology. Where these databases correspond to printed sources included in this guide you will find an asterisk (*) next to the title and a note in the annotation. Enquiries about additional databases and online searching can be made at the Reference Desk, McLennan Library.

Sources for theses have not been listed as a separate category in this guide, although some thesis bibliographies on particular topics have been included in the appropriate subject sections. The Comprehensive Dissertation Index (Z5055. U5A32x Ref. Index Stands), which covers primarily North American doctoral dissertations, provides subject and keywood access.

Indexes to periodical articles of broad sociological interest are listed in Section V. A.1., current bibliography for sociology and the social sciences. Indexes to periodical articles on more specialized topics are included in the appropriate subject section, e.g. demography.

Other Resources at McGill

Government reports, studies, and statistical compilations are extremely useful for sociological research and an enormous number of these publications are available at McGill. The Government Documents Department on the second floor of McLennan Library is a depository for all Canadian federal publications and for those of the United Nations, UNESCO, and some other U.N. agencies. In addition, it contains a useful selection of Canadian provincial and municipal publications as well as many United States, United Kingdom, Common Market, and Indian government documents. As this material does not normally appear in the McGill Library catalogues, readers are advised to go directly to the Government Documents Department where a specialized staff will provide assistance in using their catalogues, indexes, and bibliographies.

The Social Work collection (Nursing/Social Work Library) is a valuable resource for topics in applied sociology, particularly in the areas of social problems and health care. That collection places considerable emphasis on Canadian and Québec sources, especially where pamphlet and other vertical file materials are concerned.

The Social Science Computing Centre on the first floor of the Leacock Building provides several tools of use to sociologists, in addition to terminals and PCs. These include packages for the manipulation and analysis of statistics, such as SPSS and SPSSx (Statistical Package for the Social Sciences), SAS (Statistical Analysis System), and Statpak: and collections of data, i.e. census and other survey results. The Centre has manuals and other documentation for these resources and the staff there will provide assistance for users.

Other libraries containing sources for particular subjects include the Medical Library, for medical sociology and clinical aspects of applied topics: the Law Library, especially for criminology: Howard Ross Management Library for industrial sociology; the Education Library for the sociology of education; and the Religious Studies Library for such areas as the sociology of religion.

Not all locations have been indicated for items cited in this bibliography. For additional locations, consult the McGill library catalogues.

If you have any difficulty using this bibliography or the reference sources listed in it, please do not hesitate to ask a reference librarian for assistance.
